

**AUSTRALIAN CITIZEN
SCIENCE ASSOCIATION**

DISCOVER ANOTHER SIDE OF SCIENTIFIC RESEARCH

Citizen scientists don't need a science degree; they just need time and enthusiasm. Learn how you can help a huge range of projects, and make a real difference to your community and environment.

WHAT IS CITIZEN SCIENCE

Citizen science involves public participation and collaboration in scientific research with the aim to increase scientific knowledge. It's a great way to harness community skills and passion to fuel the capacity of science to answer our questions about the world and how it works.

WHAT IS ACSA?

The Australian Citizen Science Association (ACSA) was formed to advance citizen science through the sharing of knowledge, collaboration, capacity building and advocacy.

We are a member-based community that supports, informs and develops citizen science.

BECOME A MEMBER

As a member of ACSA, you are part of a vibrant and growing community of citizen science enthusiasts. Share ideas, pose questions, collaborate on projects, attend conferences and other networking events and stay up to date with all the latest information on this burgeoning field of science within Australia!
