

BIRDS IN BACKYARDS

from citizen science to conservation action

Over 90% of Australians live in urban and regional centres - increasingly it's where we connect with nature. Birds are a colourful, engaging and simple way for people to nurture that connection. Birds in Backyards (BIBY) builds the knowledge, and skills of citizen scientists and provides practical support to individuals and organisations to take action to protect our native birdlife.

Our goal is a diverse native bird community achieved by engaging citizen scientists that take action in their space to conserve birds and create habitat.

LEARN

✈ All about **AUSSIE BIRDS** - try our BIRD ID tool - www.birdsinbackyards.net/finder

✈ Discover **RESOURCES** such as planting guides, posters, school activities and more!

✈ Watch videos at **BIBYTV** on YouTube

CELEBRATING
20 YEARS
1998 - 2018

PARTICIPATE

✈ Submit a survey on **BIRDATA** and help us understand and protect urban birds - birddata.birdlife.org.au

✈ Join our online **FORUMS** and find us on **SOCIAL MEDIA**
Online: www.birdsinbackyards.net/forum
Facebook: /BirdsinBackyards and /BirdLifeAustralia
Twitter: @UrbanBirdsOz and @BirdLifeOz

CREATE

✈ **HABITAT** - sharing spaces with birds
www.birdsinbackyards.net/places

✈ **CHANGE** - informing policies, best practice guidelines, and advocating for the protection of our native urban birds

Bringing it together in our

PROJECTS

Birds in Schools: empowering students to create habitat on school grounds using their own data

Powerful Owl Project: conserving a threatened species in urban landscapes through the power of citizen scientists

On-ground Action Projects: partnering with councils on issues facing local birds and their habitat

TAKE ACTION TODAY!
